Programs for the Phosphate Beneficiation Process

Phosphate Flotation Circuit

The flotation circuit is at the heart of your business. Efficiently maximizing recovery and grade are the main drivers. This becomes even more challenging as ore grades diminish over time. It is crucial to work with a partner who understands your entire process and brings new and innovative programs to the industry. Nalco Water brings the experience and expertise to deliver superior solutions to your circuit. We understand your objectives and challenges and we continue to develop programs which deliver results every day.

NALCO WATER PROGRAMS

- Anionic Collectors
- Flotation Additives
- Dewatering Aids
- Solid Liquid Separation
- Dust Control

VALUE DELIVERED

- Increased recovery
- Reduced cost per ton produced
- Optimized performance

CHOOSE NALCO WATER

- Unmatched testing and analytical services to identify the best program to maximize recovery
- Unequaled level of Nalco Water onsite support and service
- Comprehensive line of filter aids delivering performance over a variety of ore types
- Decades of field experience in solid liquid separation
- Unrivaled expertise in dust control
- 1600 global RD&E associates including Chemists, Engineers and Scientists
