

POWERFUL COFFEE AND TEA DESTAINER

Dip-It™ XP

- ▲ Concentrated formula quickly penetrates and removes tough coffee, tea and food stains for sparkling clean results.
- ▲ Effectively removes rancid coffee oils and tannins, which can destroy “fresh brewed” taste and aroma.
- ▲ Safe to use on plastic, china and metal surfaces; works in both hard and soft water conditions.

Effective destaining helps you brew fresh tasting beverages and present spotless drinkware for a positive guest experience.

Ordinary destainers that contain chlorine will pit and corrode plastic glaze surfaces and make staining problems worse. Dip-It XP has a chlorine-free formula that is safe on most surfaces, works quickly to remove stains, and creates a positive impression for guests.

DIRECTIONS:

Destaining Plastic and China Dinnerware

1. Dissolve 1.5 tablespoons of Dip-It XP per gallon of water. Keep solution hot between 140° - 160°F.
2. Immerse utensils; let soak until stains are removed.
3. Rinse thoroughly in clean water or run them through a dishmachine.

Destaining Coffee and Tea Makers (Automatic Fill)

1. Insert coffee filter into basket and measure 1.5 tablespoons of Dip-It XP into filter/per one gallon.
2. Run brew cycle – twice if necessary.
3. Flush with clear water until solution is clear.

Destaining Coffee and Tea Dispensers (Portable Thermal Type)

1. Flush empty container with clear water.
2. Scrub all parts with a solution of Dip-It XP, 1/2 to 1 oz. per gallon of hot water.
3. Rinse thoroughly with fresh water and invert to air dry.

Before coffee and tea stain removal...

...and after.
