

Ecolab[®] Disinfectant 1 Wipe With Plastic-Free Wipes¹

The wipe that performs without the plastic.¹

Request a sample!

Most disinfecting wipes are made of plastic; this wipe is not. Welcome to your plastic-free wipe¹ experience.

Disinfect with fewer wipes²

With advanced surface coverage and surface wetness maintained, disinfect with fewer wipes,² helping optimize disinfecting time, cost, and waste.

1-minute disinfection time¹

Kills 40+ organisms in 1-minute or less,¹ including SARS-CoV-2 (30 seconds), *Mycobacterium bovis* (Tb) (45-seconds), Influenza A and B Viruses (60 seconds).¹

Decrease environmental impact

Addresses the primary source of the plastic – the wipe.³ Wipe is degradable⁴ – breaks down faster than plastic-wipes.⁴ Helps to reduce waste by disinfecting with fewer wipes.²

Did you know?

Most of the plastic in healthcare disinfecting wipes comes from the wipe itself, not the packaging.³ Each year, North American healthcare facilities use enough plastic disinfecting wipes to circle the globe 58 times.⁵

Designed to provide advanced surface coverage.

Highly absorbent wood-pulp fiber wipe

Locks in and evenly distributes disinfectant over surfaces, while effectively removing soils.

Disinfectant stays on the surface

Keeps surface better saturated than alcohol-based disinfectants, which evaporate quickly.⁶

★ “has insane surface coverage” Healthcare Technician⁷

Available in a range of formats to get the job done.

	Wipe Size	Wipes/Pack	Packs/Case	SKU
Soft-Pack	5.75" x 7"	110	12	6000350
Large Canister	6" x 6.25"	160	12	6000390
Extra Large Canister	6" x 13"	75	12	6000393
Bucket	8" x 10"	375	2	6000378
Refill Bag	8" x 10"	375	2	6000382

- Does not contain dyes or fragrances, and does not require PPE¹
- Robust material compatibility on most hard non-porous surfaces¹
- Kills *Candida auris* (75 seconds)¹
- A USDA Certified Biobased Product¹
- Active Ingredient: Dodecylbenzene sulfonic acid (DDBSA)

Footnotes:

1. Wipe material is plastic-free (packaging made of plastic: canister, soft-pack, bucket, refill bag), and is a USDA Certified Biobased Product (wipe material is 96% biobased). EPA Reg. No. 1677-263. Kills 40+ organisms in 60 seconds and kills *C. auris* and *T. interdigitale* in 75 seconds (refer to label for organism listing). Refer to product label for use directions. Biobased claim does not imply the safety of the product. Users must read and follow all label instructions.

2. Internal testing and a 4-week research study at an ambulatory surgery center in Minnesota demonstrated that Ecolab's wipe may reduce wipe usage up to 33% vs. the market leader's 1-minute, alcohol-based healthcare disinfectant wipes, and up to 50% vs. the same market leader's 2-minute, alcohol-based healthcare disinfectant wipe. Your results and dry times will vary based on temperature, humidity, air flow, and adherence to product use instructions.

3. Of the total plastic produced from disinfecting wipe canisters, 58% comes from the wipe. Calculations and reductions based on a 6" x 6.75" wipe, with 34 gsm substrate, 160 wipes per canister and a combined canister lid mass of 100g. Of the total plastic produced from disinfecting wipe XL refill bags, 94% comes from the wipe. Calculation and reduction of up to 97% is based on comparison to a commercially available refill bag with XL plastic-wipe: 11" x 12" size wipe, with 34 gsm substrate, 160 wipes/refill bag, bag mass of 30 g.

4. ASTM D5511 quantitative laboratory tests performed on wipes substrate have demonstrated 94.3% relative degradation in 15 days of accelerated landfill testing, for the Ecolab Disinfectant 1 Wipe, with wipe derived from wood pulp fibers, and 0.6% relative biodegradation for a standard plastic-based wipe under the same test conditions. Actual rates of degradation will vary based on landfill conditions.

5. Based on DRG 2023 healthcare disinfecting wipes sales data at the individual SKU level. Multiplying the total wipes sold by SKU x the wipe length of the individual SKUs. Divided the total length by the circumference of the earth.

6. Internal tests show that Ecolab's DDBSA-based wipe (6 x 13") provides greater wet surface area coverage compared to the market-leading alcohol-based healthcare disinfectant wipes (7.5 x 15").

7. Blinded healthcare worker research. Healthcare workers were compensated for their time, but did not know Ecolab® was the sponsor of the study. Brand labels were hidden or removed from packaging during the testing.
