

Ecolab Large Fly Program

Ecolab's Large Fly Program uses an outside-in approach to reduce large flies and eliminate their presence in internal, high-risk areas. Our program uses a science-based protocol to:

PREVENT large fly entry through service inspections and actionable insights

REDUCE large fly pressure with regular service to fly traps and equipment and application of exterior treatments

ELIMINATE large fly activity with professionally applied and targeted interior treatments and regularly serviced equipment

The proven,
scientific way
to eliminate
large flies

STEALTH™ Fly Station

- Uses odor and visual components to attract flies
- Attracts and eliminates flies before they enter a facility
- Reduces flies entering facilities by up to 50%
- Ecolab Service Specialist applies targeted treatments during regular service visits

EXTERIOR

Type	External Panel
Areas of Usage	External
Dimensions (inches)	H24 x W18.1 x D1.2
Weight	2.20 lbs
Mounting	Wall

STEALTH™ Maxima Fly Light

- Conceals trapped flies from view
- Best suited for back of house or large format customer locations (i.e. F&B plant)
- Can trap up to 1,000 large flies in high-pressure situations

INTERIOR

Type	Glueboard (Electric)
Areas of Usage	Large Format, Back of House
Dimensions (inches)	H11 x W24.8 x D11
Weight	5.7 lbs
Mounting	Wall

STEALTH™ CFL (Compact Fluorescent Light) Fly Light

- Conceals trapped flies from view
- Best suited for front of house or small footprint locations (where STEALTH Maxima is not a fit)
- Catches more flies in a head-to-head comparison with comparative Insect Light Traps (ILTs)

INTERIOR

Type	Glueboard (Electric)
Areas of Usage	Office, Front of House
Dimensions (inches)	H12.2 x W18.1 x D6.3
Weight	4.19 lbs
Mounting	Wall
