Driver Behaviors

Tamper Evidence

Temperature Control

Container Hygiene

Brand Compliance

Quality Control

Last Mile Quality Assurance Assessment

Food delivery service can either be a speedbump or a booster to your business, depending on how the food is delivered to the hands of your customers.

Key questions to ask:

- Who owns the customer relationship - you or the 3rd party delivery service provider?
- How to assure the food quality & integrity is sound when your customers receive their food?
- What is your visibility after the food leaves your restaurant?

EcoSure Assessment Solution

EcoSure provides you with the **Last Mile Quality Assurance** assessment to help you meet your promise to your customers.

- Verifying delivery service protocol is followed
- Identifying gaps in tamper evidence & food integrity
- Check on packaging, food quality and temperature control
- Validate hygiene standards about driver and container
- Providing visual proof of the delivered food and packaging
