

# Advanced Cleaning Solutions for Body Care Manufacturing

Your trusted partner for  
cleaning, compliance  
and operational  
excellence

# Body Care Solutions at a Glance

Ecolab delivers advanced cleaning solutions designed for the unique challenges of body care manufacturing. Our expertise and tailored chemistries help you safeguard product quality, meet evolving regulations, and optimize plant efficiency so you can confidently deliver safe, high-quality products every batch.

# We Understand your Challenges in Body Care Manufacturing

Manufacturing Body Care products isn't easy. Every day you manage complex formulations, ensure product safety and regulatory compliance, and maintain production efficiency, all while meeting consumer expectations for quality and sustainability. Here are some of the biggest challenges we believe you may face.

## Microbial Contamination

Cross-contamination between product lines is a major risk, especially in multipurpose plants.

## Regulatory Compliance

Navigating strict body care & OTC evolving regulations demands flawless documentation and validated cleaning processes.

## Cost Control

Rising material costs and downtime make controlling expenses critical.

## Quality Consistency

Variability in raw materials, or inadequate cleaning between batches can lead to product defects, recalls or brand reputation risks.

## Innovation vs Stability

Balancing innovation with process stability and validated cleaning protocols is critical to avoid downtimes and compliance issues.

We hear you and we're here to help you overcome these challenges

## Understanding the Complexities of Body Care Manufacturing

From lotions and creams to body washes and scrubs, we understand the unique challenges of working with emulsions, surfactants, oils, and active ingredients that leave stubborn residues behind.

## Protecting Brand Integrity

Ecolab's hygiene solutions minimize contamination risk, support regulatory compliance, and help safeguard your brand reputation by ensuring every batch meets the highest standards.

## Solutions Designed for Body Care Soils

Our cleaning & sanitization programs are engineered to remove residues from thick creams, OTC products and moisturizing formulations, helping you maintain efficiency and product integrity.

## Global Expertise, Local Support

We offer industry-leading technical expertise in Body Care manufacturing, backed by on-site service and technical support to suit your plant's specific needs.

# Ecolab Solutions that Drive Efficiency, Compliance and Confidence in Body Care Manufacturing

Ecolab provides a comprehensive suite of solutions designed to support Body Care manufacturing at every stage of production. These offerings help to ensure quality, efficiency and compliance at every location.

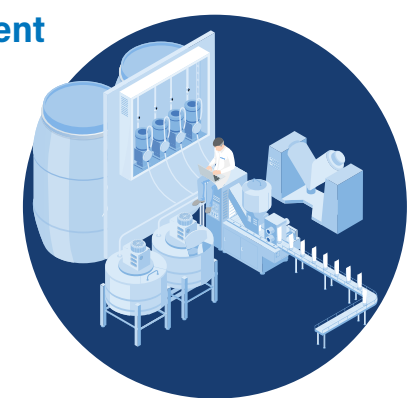

## Chemistry

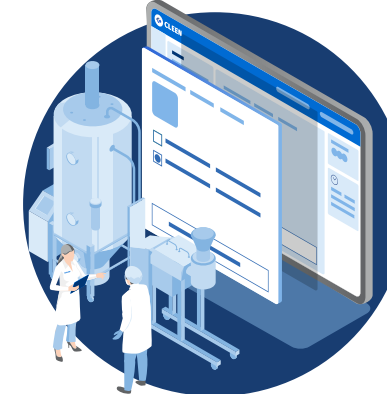

- ▼ Advanced cleaning & sanitization solutions formulated for Body Care soils like emulsions, surfactants, oils and conditioning agents
- ▼ Ecofriendly chemistry that supports sustainability goals by reducing water, energy and time
- ▼ Proven efficacy against microbial risks to protect product integrity and consumer safety

## Equipment

- ▼ Precision dosing systems for accurate chemical delivery: critical for controlling costs and ensuring consistent cleaning of tanks, mixers and transfer lines

## Digital

### CLEEN by Ecolab:

- ▼ We automate your cleaning validation, digitalize SOPs, and provide real-time insights to reduce compliance risks and ensure 24/7 audit readiness
- ▼ Streamline workflows, accelerate changeover times, and leverage analytics to optimize production capacity and reduce downtimes

## Expertise

- ▼ Global Technical Consultants with comprehensive knowledge of Body Care processes and ingredient complexities
- ▼ Guidance on meeting global cosmetic standards and support in validating cleaning protocols
- ▼ Support for new product launches by ensuring hygiene without compromising formulation stability

# Confidently Navigate Change in Body Care Manufacturing with Ecolab

## Discover Ecolab's Change Management Program

Switching to a new regime can come with operational challenges. Discover how Ecolab's expert team of Global Technical Consultants can ease the implementation of a regime change for body care manufacturers regime with a customized end-to-end Change Management plan to suit your specific needs.

Support is available for all steps in the process that are relevant for you, from initial risk assessment, all the way through to training and implementation. Leverage Ecolab's expertise to ease the acceptance, approval and implementation of change, enabling you to focus on the core of your body care manufacturing.
