

Comprehensive Solutions for Makeup Manufacturing

Your trusted partner for
cleaning, compliance
and operational
excellence

Makeup Solutions at a Glance

Ecolab delivers comprehensive solutions for the unique needs of makeup production and manufacturing. Our expertise, innovation and chemistry are all tailored to support your cleaning & sanitation requirements. As your trusted partner we will help to meet regulatory standards, optimize operations and keep your production compliant.

Understanding the Complexities of Makeup Manufacturing

We understand the unique challenges of working with makeup residues: from pigments and oils, to waxes, polymers and titanium dioxide.

Protecting Brand Integrity

We deliver reliable hygiene solutions that minimize contamination risk, support regulatory compliance and protect the reputation of your makeup products.

Global Expertise, Local Support

We offer industry-leading technical expertise in Makeup manufacturing, backed by on-site service and technical support to suit your plant's specific needs.

Solutions Designed for Hard-to-Clean Soils

Our cleaning & sanitation programs are engineered to remove residues common in makeup production, helping you maintain efficiency and product integrity.

We Understand your Challenges in Makeup Manufacturing

Manufacturing Makeup Products Isn't Easy. Every day you manage complex formulations with pigments and active ingredients, ensure product safety and regulatory compliance across global markets, and maintain production efficiency all while meeting consumer expectations for color accuracy, texture consistency, long wear, and sustainability. Here are some of the biggest challenges we believe you may face.

Microbial Contamination

High humidity and organic residues create microbial growth risks that threaten product's safety and shelf life.

Regulatory Compliance

Navigating strict cosmetic and OTC drug regulations demands flawless documentation and validated cleaning processes.

Sustainability Needs

Balancing effective cleaning with reduced water, energy and chemical use is essential.

Cost Control

Rising material costs and downtime make controlling expenses critical.

Hard-to-Clean Soils

Pigments, oils, waxes, polymers and titanium dioxide leave stubborn residues that are tough to remove.

We hear you and we're here to help you overcome these challenges

Ecolab Solutions that Drive Efficiency, Compliance and Confidence in Makeup Manufacturing

Ecolab provides a comprehensive suite of solutions designed to support Makeup manufacturing at every stage of production. These offerings help to ensure quality, efficiency and compliance at every location.

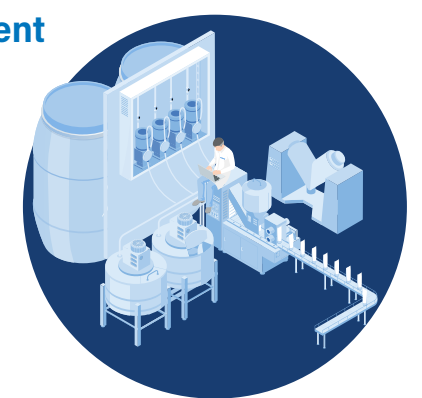

Chemistry

- Advanced cleaning solutions engineered for the makeup industry to combat hard-to-remove soils like pigments, waxes, oils, polymers, and titanium dioxide
- Formulas that break down stubborn residues without damaging delicate equipment or affecting product integrity

Equipment

- Precision dosing systems for accurate chemical delivery: critical for controlling costs and ensuring consistent cleaning of tanks, mixers and transfer lines

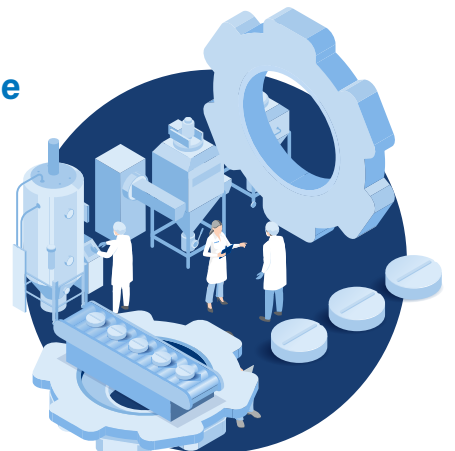

Digital

CLEEN by Ecolab:

- We automate your cleaning validation, digitalize SOPs, and provide real-time insights to reduce compliance risks and ensure 24/7 audit readiness
- Streamline workflows, accelerate changeover times, and leverage analytics to optimize production capacity and reduce downtimes

Expertise

- Global Technical Consultants with comprehensive knowledge of Makeup processes and ingredient complexities
- Guidance on meeting cosmetic regulatory standards and support in validating cleaning protocols
- Support for new product launches by ensuring hygiene without compromising formulation stability

Confidently Navigate Change in Makeup Manufacturing with Ecolab

Discover Ecolab's Change Management Program

Switching to a new regime can come with operational challenges. Discover how Ecolab's expert team of Global Technical Consultants can ease the implementation of a regime change for makeup manufacturers regime with a customized end-to-end Change Management plan to suit your specific needs.

Support is available for all steps in the process that are relevant for you, from initial risk assessment, all the way through to training and implementation. Leverage Ecolab's expertise to ease the acceptance, approval and implementation of change, enabling you to focus on the core of your makeup manufacturing.
