

Rodent Ceiling Service

Enhanced Coverage and Proven Science

Rodent Activity in Void Spaces is a Common Problem

Rodent mitigation services are traditionally a “ground game” with a “strengthen the perimeter” approach. But rodents commonly find their way into walls, overhead piping and ductwork, and other hard-to-access structural voids in food and beverage processing facilities.

Ecolab Rodent Ceiling Service Provides an Elevated Solution

Ecolab’s Rodent Ceiling Service elevates your service and protection, providing expanded coverage with innovative technology designed for hard-to-access spaces. This early warning system enables our highly trained service specialists to identify emerging rodent issues early and eliminate the problem — before it can grow and damage your business and brand.

Innovative Technology

Exclusive, award-winning equipment specifically designed for baiting and trapping within hard-to-access void spaces

Early Detection

Early detection enables proactive response to help mitigate the risk of an infestation negatively impacting your business

Expert Service

Ecolab experts use strategic coverage to deliver more proactive service to help mitigate future rodent risks

40% OF FACILITIES with interior rodent activity also have

ACTIVITY IN CEILING AND/OR VOID SPACES*

Food Safety Risks

Plant Shutdowns

Lost Revenue

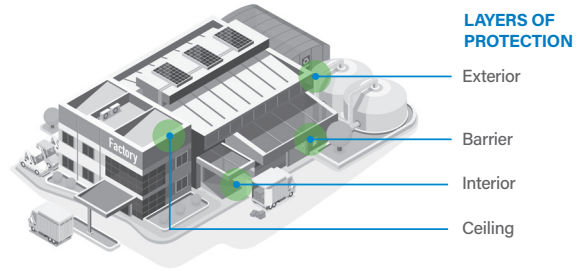

3X **FASTER REDUCTION** of interior rodent activity in a facility with Rodent Ceiling Service early detection*

*Based on a 12-month case study using Ecolab data.

Ceiling Protection

Taking Our Outside-In Approach to a Higher Level

Ecolab's Rodent Ceiling Service supplements our best-in-class rodent mitigation program, further strengthening our comprehensive outside-in approach by expanding our offering to include ceiling protection.

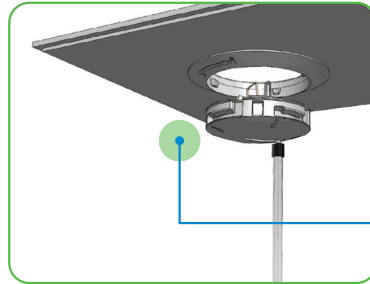

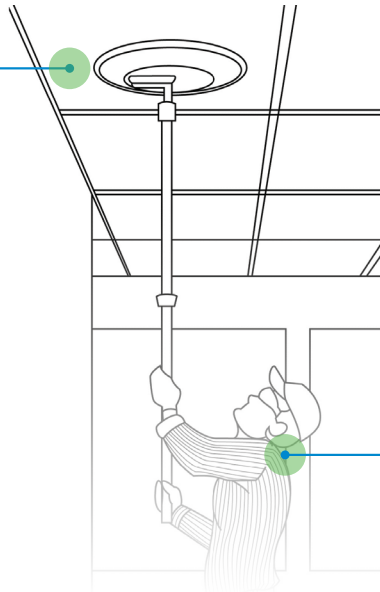

INNOVATIVE IDENTIFICATION & ELIMINATION TECHNOLOGY

Versatile Placement:
Designed to be used in various void spaces and hard-to-reach areas.

Now compatible with
Pest Intelligence
Powered by **ECOLAB3D™**

Easy Access:
Easy access facilitates regular checks during each service visit, without requiring a ladder.

Easy Installation:
Quick installation in hard-to-access ceiling and void spaces.

Expanded Coverage

Ecolab's Rodent Ceiling Service enables expanded coverage of rodent activity in hard-to-access areas, greatly expanding protection beyond what manual inspections can achieve

Continuous Business Value

Expanded coverage and proactive risk reduction provides a higher level of protection for your operation, helping mitigate the much larger costs of audit citations, plant shutdowns, food safety issues or recalls that could seriously damage your business and brand.
