

ELIMINATE GREASY BUILDUP

Greasestrip Plus™

- ▲ Quickly cuts through tough, baked-on soils.
- ▲ Clinging gel provides 100 percent surface contact.
- ▲ Non-butyl formula meets V.O.C. regulations.

High-performance clinging gel degreaser effective on ovens, grills, stove hoods, vents and broilers.

Greasestrip Plus™ features a unique gel formula that provides 100% surface contact, unlike regular foam cleaners, which create air pockets that prevent product from touching the surface. It quickly cuts through caramelized, carbonized and burnt-on/baked-on soils, in addition to reducing hazardous fumes and flashbacks. Unique formula contains an inhibitor that protects stainless steel from blackening when product is applied to hot surfaces, and won't damage melamine.

DIRECTIONS:

1. Spray Greasestrip Plus onto warm (120°-130° F) surface to be cleaned. Cover soiled areas completely with gel.
2. Allow Greasestrip Plus to penetrate grease deposits. Do not let dry on surface.
3. Wipe off dissolved and loosened grease with a damp cloth.
4. Rinse surface with clear water.

NOTES:

Wear goggles, rubber gloves and long sleeved garments when using this product. Do not use on aluminum or painted surfaces.
