Hand Hygiene Dilution System 1.3 L

A unique hand hygiene system that provides cost savings, workflow benefits and sustainability, through concentrated chemistry and refillable bottles.

Sustainability

- Reduce plastic waste by up to 90%[1]
- Reduction in cardboard by up to 75%
- The concentrated formula reduces the need for frequent orders, helping reduce freight by up to 90%[1]

Savings through reduced product and packaging waste

- Refillable cartridges reduce product waste by up to 30% per unit[1]
- Concentrated chemistry helps reduce packaging waste when compared to standard cartridges
- One 1.3 L bottle of concentrate yields approximately 17 bottles of 750 mL ready-to-use Foam Hand Soap

Workflow benefits

- Proactively refill empty dispensers at a set schedule
- Predictable workflow management while minimizing product waste

1 Calculations based on concentrated chemistry that is diluted into reusable packaging with the Hand Hygiene Dilution System when compared to single-use RTU products and packaging.

2 Based on the Hand Hygiene Dilution System reusable packaging that can be proactively refilled compared to the standard 750 mL packaging.

ECOLAB®

PROTECTING WHAT'S VITAL™

A safe, sustainable solution that helps improve efficiency and decrease costs

Simple operation

- Simply dock the Hand Hygiene Dilution System bottle and push the button to fill
- Quick and easy refills with the Bottle Caddy

Backed by scientific expertise

- Formulated with hand care science and skin health ingredients to ensure an effective clean

A full line of concentrated hand hygiene products available
