

Hand Hygiene Dilution System

A unique hand hygiene system that provides cost savings, workflow benefits, and sustainability through concentrated chemistry and refillable bottles.

Sustainability

- Reduce plastic waste by up to 90%¹
- Reduction in cardboard by up to 75%
- The concentrated formula reduces the need for frequent orders, helping to reduce freight by up to 90%¹

Savings through reduced product and packaging waste

- Refillable cartridges reduce product waste by up to 30% per unit¹
- Concentrated chemistry helps reduce packaging waste when compared to standard cartridges
- One 2 L bag of concentrate yields approximately 27 bottles of 750 mL ready-to-use Foam Hand Soap or Sanitizer, and 13.5 bottles of 750 mL ready-to-use Antibacterial Hand Soap

Workflow Benefits

- Proactively refill empty dispensers at a set schedule
- Predictable workflow management while minimizing product waste

¹ Calculations based on concentrated chemistry that is diluted into reuseable packaging with the Hand Hygiene Dilution System, when compared to single-use RTU product and packaging.

An effective solution that helps improve efficiency and decrease costs

Simple operation

- Simply dock the Hand Hygiene Dilution System bottle and push the button to fill
- Quick and easy refills with the Nexa™ Bottle Caddy

Backed by scientific expertise

- Formulated with hand care science and skin health ingredients to ensure an effective clean

A full line of concentrated hand hygiene products available
