

STERILE

Klercide®
Cleanroom Quat*

A quaternary ammonium compound solution specifically designed for pharmaceutical cleanrooms

Leaves minimal residue reducing the need for frequent rinsing

A ready-to-use sanitizer ideal for routine use on hard surfaces. Klercide Cleanroom Quat is designed to be efficacious at a low concentration resulting in minimal residues. This makes it ideal for high grade cleanrooms and critical manufacturing areas.

Klercide Cleanroom Quat is available in multiple formats, including either a ready-to-use 1 US gallon capped container or 32 oz trigger spray bottle.

Klercide Cleanroom Quat is:

- A quaternary ammonium compound
- Available double bagged
- 32 oz spray bottle incorporating our proprietary and validated SteriShield Delivery System (SDS)

The SteriShield Delivery System (SDS) features:

- A closed and validated trigger system providing a completely sealed system
- Ensures the integrity of the contents throughout use
- Validated in-use shelf life of three months
- Dispensing of the full volume of product
- A fully adjustable spray pattern to ensure optimum surface coverage

*Same product available outside of US and Canada as Klercide Low Residue Quat.

STERILE

Klercide® Cleanroom Quat

A quaternary ammonium compound solution specifically designed for pharmaceutical cleanrooms

Why use Klercide Cleanroom Quat?

Operator safety

Klercide Cleanroom Quat is effective with a low concentration of quaternary ammonium compound, which reduces the likelihood of residue accumulation that may cause sticky floors, slips and falls.

Reduced cost of use

It eliminates the need for frequent or daily residue management which may help increase production time and reduce costs related to residue management such as labor and time associated with additional rinsing.

A non-hazardous product with excellent material compatibility, and operator acceptance, so costs can be further reduced by controlling indirect costs such as PPE.

Compatible

Klercide Cleanroom Quat can be used on most types of hard surfaces in cleanrooms, controlled environments, isolators, equipment and production vessel exteriors and is compatible with other Ecolab Klercide products.

Designed for cleanrooms

The product is manufactured in Ecolab's ISO 9001 accredited facilities to the principles of GMP. These conditions ensure Klercide Cleanroom Quat is manufactured to the highest quality and is compliant for use in your critical areas.

Klercide Cleanroom Quat is:

- Made with a quaternary ammonium compound
- Blended with Water for Injection (WFI)
- 0.2 micron filtered and sealed under unidirectional ISO Class 5 air-flow
- Bagged in ISO Class 7 cleanroom, for easy transfer into cleanrooms
- Supported with Certificates of Analysis and Sterility for every batch

Klercide Cleanroom Quat
32 oz spray, 1 US gal capped

Microbiological test results

Efficacy	Contact time
Non-food contact sanitizer	5 min

Technical specifications

Application area

For use on floors, walls and hard surfaces.

Instructions for use

Spray: For optimum results hold bottle upright and spray from a distance of 6 to 8 inches. Always close the nozzle after use.

Wetting: Apply solution with mop, disposable wiper, coarse spray device or by soaking so as to wet all surfaces thoroughly. Allow surfaces to remain wet for a minimum of 5 minutes and then either allow to air dry or if desired wipe dry with a (sterilized) cloth or wiper. See label for complete directions for use.

Ingredients

0.037% didecyl dimethyl ammonium chloride and Water for Injection (WFI).

Registration details

EPA Reg. No. 1677-257

Packaging information

Cleanroom Quat Blended with WFI	
Unit size	**Unit of sale**
32 oz spray	6 x 32 oz
1 US gal capped	4 x 1 US gal
