

A BROAD SPECTRUM DISINFECTANT WITH SPORICIDAL ACTIVITY

Klercide™ Sporicidal Active Chlorine Unit Dose Concentrate

Sporicidal hard surface disinfectant in unit dose tablets

A versatile, sporicide with a broad spectrum of activity specifically formulated to help control microbial contamination most likely to be found in a cleanroom environment, including difficult to kill bacterial spores.

Klercide Sporicidal Active Chlorine is available in a variety of sizes and formats for optimum performance, including a soluble unit dose concentrate format that makes up to 10 liters (2.64 gal) of ready-to-use product. It is ideal for use in large areas such as walls, ceilings and floors.

Klercide Sporicidal Active Chlorine Unit Dose Concentrate:

- ▲ Easily creates the correct, validated concentration reducing the likelihood of a dilution error

- ▲ Requires minimal handling to dilute
- ▲ Controls microbial contamination found in cleanrooms
- ▲ Double-bagged and gamma irradiated

PRODUCT QUALITY ASSURANCE

Manufactured in our state-of-the-art facilities to the principles of cGMP, Klercide Sporicidal Active Chlorine Unit Dose Concentrate is safe for use in core manufacturing areas.

ECOLAB®

Everywhere It Matters.™

Klercide™ Sporicidal Active Chlorine Unit Dose Concentrate

Sporicidal hard surface disinfectant in unit dose tablets

Why use Klercide Sporicidal Active Chlorine Unit Dose Concentrate?

PRECISION

The product is available in a single use tub containing 17 x 10g tablets to allow the correct dosing every time. The effervescent tablets have been designed to dissolve quickly to provide a sporicidal disinfectant solution suitable to control microbial contamination likely to be found in a cleanroom environment.

SIMPLE

The single unit dose of 17 x 10g tablets reduces handling and ensures precise dilution. This results in a cost effective, simple solution to a wide range of cleanroom contamination control challenges.

EFFECTIVE

Klercide Sporicidal Active Chlorine Unit Dose Concentrate is a sterile sodium dichloroisocyanurate product that creates a solution containing 0.5% (5000ppm) available chlorine upon dilution. Its broad-spectrum activity includes bacterial spores.

It is especially suitable where high level sporicidal activity is required. No additional activators are required.

DESIGNED FOR CLEANROOMS

Klercide Sporicidal Active Chlorine Unit Dose Concentrate is manufactured to the highest quality and is compliant for use in your critical areas.

Klercide Sporicidal Active Chlorine:

- ▲ Passes AOAC disinfectant standards for bactericidal, fungicidal and sporicidal efficacy
- ▲ Passes ASTM standards for non-food contact sanitizer and virucidal
- ▲ Double bagged and gamma irradiated
- ▲ Supported with Certificates of Analysis and Sterility with every batch
- ▲ Supported with full documentation

MICROBIOLOGICAL AND VIROLOGICAL TEST RESULTS

EFFICACY OF DILUTED SOLUTION	CONTACT TIME
Disinfectant (AOAC Use Dilution)	7 min
Non-food contact sanitizer (ASTM E-115)	3 min
Fungicidal (AOAC)	5 min
Virucidal (ASTM 1053)	5 min
Sporicidal (AOAC 966.04)	5 hours

APPLICATION AREA

For use on floors, walls and hard surfaces.

INSTRUCTIONS FOR USE

Empty all contents into 10L of water of suitable quality for the environment in which it is to be used. This creates a solution containing 0.55% (5500 ppm) available chlorine. Mix gently and when entirely dissolved use immediately.

Use standard procedure to wet surfaces entirely. For industrial use only. Dispose of packaging only if emptied and closed.

INGREDIENTS

53% sodium dichloroisocyanurate. When diluted, creates a solution >5000 ppm available chlorine.
