

Automated Dispensing

QUADEXX™ PRO

ALLOCATION SYSTEM:

An integrated approach
to cleaning and sanitation

The FLEXIBILITY you want – the INSIGHT you need

Cleaning and sanitation program management is complex. From issues of regulatory compliance and operational efficiency to worker safety and sustainability, you face a variety of challenges every day.

OPTIMIZED CLEANING & SANITATION PERFORMANCE: Brought to you by accurate, robust chemistry delivery

QUADEXX™ PRO is an integrated and flexible automated chemical product dispensing platform. It provides visibility and insight – helping you optimize your chemical usage, enhance compliance and safely dispense cleaning solutions.

FOOD SAFETY

PRODUCT QUALITY

Enhanced food safety, product quality & FSMA/FDA compliance

- Consistent cleaning using application-specific products
- Chemical usage tracking via web reporting and dashboards
- Comparisons of cleaning programs across facilities

COSTS

Minimized operational costs & increased efficiency

- Reduced over-usage and re-cleaning
- Proper chemistry selection for equipment compatibility
- Maximized product availability with minimal SKUs/footprint

WASTE

SAFETY

Improved worker safety & sustainability

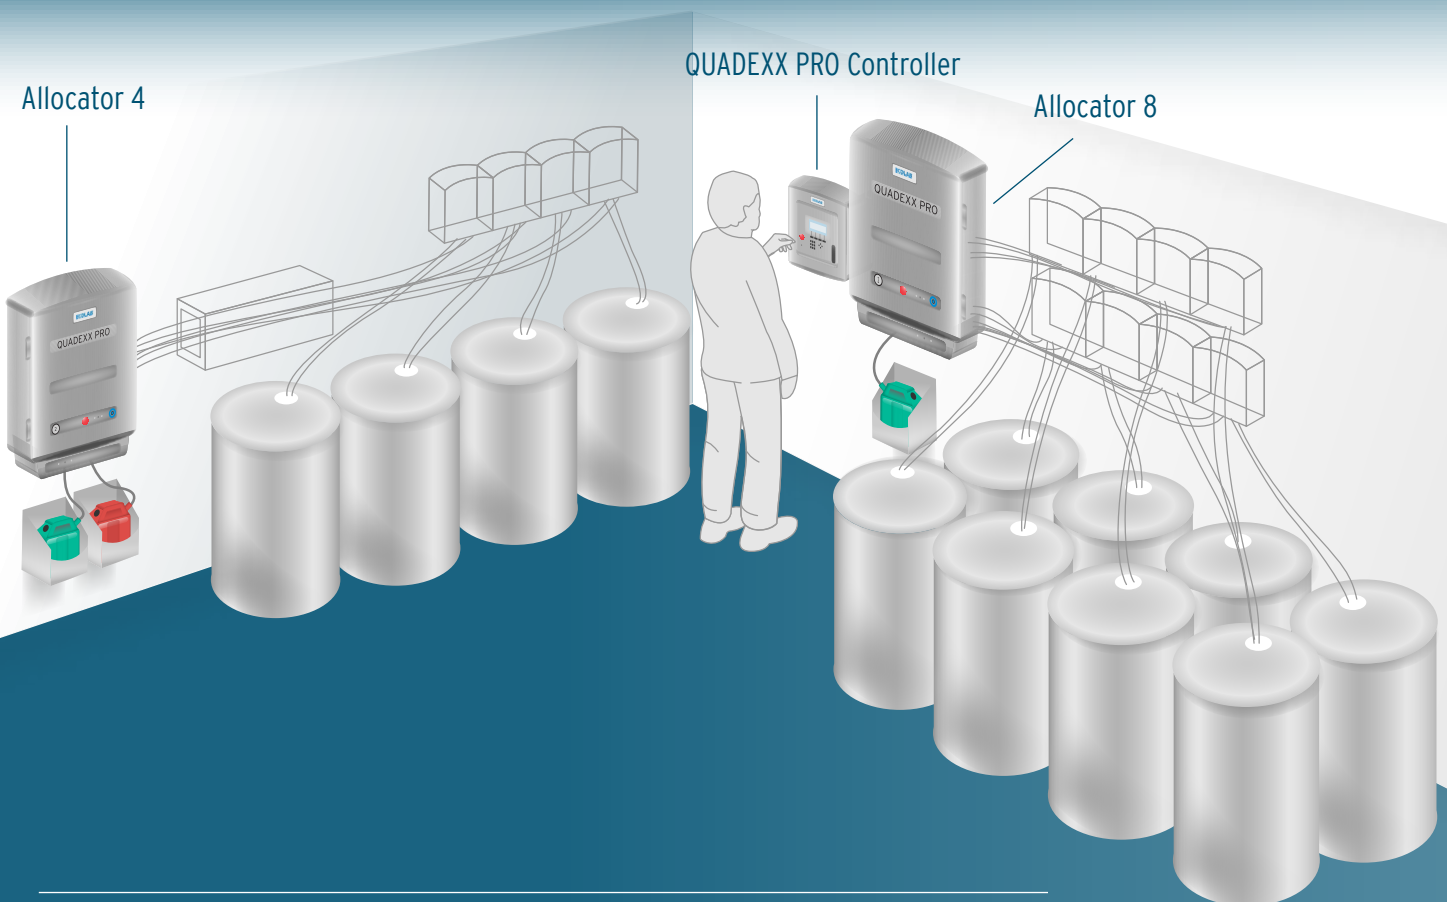

- Reduced chemical handling
- Controlled chemical access
- Effluent-friendly options

INSIGHTFUL REPORTING:
QUADExx PRO Web Portal

A STRAIGHTFORWARD APPROACH

Implementing QUADEXX PRO is easy and hassle-free. Your service specialist will work with you to identify your cleaning and sanitation needs, designing a customized solution for your operation.

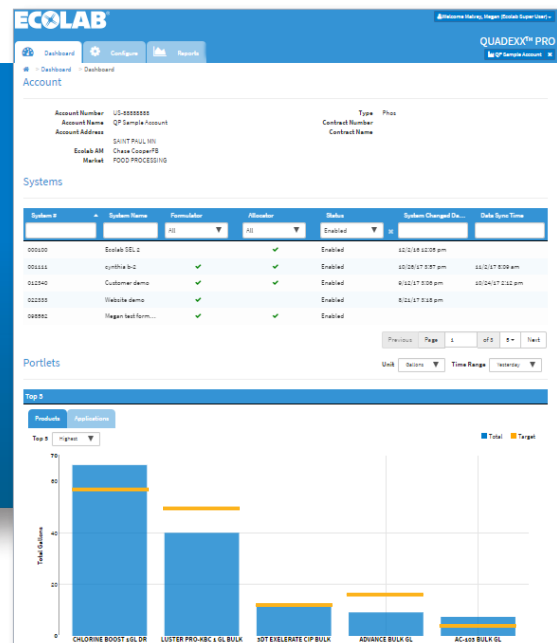

- ✓ Your service specialist configures the QUADEXX PRO system on the website
- ✓ Chemistry is dispensed accurately, safely and consistently
- ✓ On-site QUADEXX PRO data is transmitted to website in real-time
- ✓ Data is immediate availability for download and analysis
- ✓ QUADEXX PRO Insights Report provides a high-level summary every week

ACTIONABLE INSIGHT

Included with the QUADEXX PRO system, you will receive access to a secure website with chemical usage information by user, time and unit operation to help optimize your cleaning and sanitation program and verify regulatory compliance.

- Dashboard Portlet: Monitor products and applications
- Online & Download-Ready Reports: Review system usage, configurations and billing information
- Insights Reports: View of data to provide information "at-a-glance" for optimization opportunities
