

Sanitising Floor and Drain Cleaner

Sanitising Floor and Drain Cleaner is a non-rinse floor and drain cleaner.

Its enzymatic formulation is designed specifically to cut fats, oils and grease soils commonly found on kitchen floors and surfaces. Its sanitising properties reduce bacteria and the odours they cause and help prevent cross-contamination between different areas and surfaces. Suitable for use on quarry tile floors, epoxy sealed floors, ceramic surfaces, linoleum, laminate, marble, aluminium, stainless steel, brass and polycarbonate.

Reduce grease build up on grout lines

4-in-1 product: floor cleaner & sanitiser, drain cleaner & drain sanitiser

Use with cold or warm water

Mitigates drain flies

Reduces risk of slips and falls

Recognised Environmental Credentials Scheme by Accord

No rinse required

Suitable on most hard surface floors

CLEANER. SAFER. HEALTHIER

ECOLAB®

Sanitising Floor and Drain Cleaner

Recognised Environmental Credentials Scheme by Accord

Independently assessed by Accord on the Recognised Environmental Credentials Scheme and endorsed by an independent Expert Panel of toxicologists so you know you are making a positive environmental choice.

Use Instructions

Do not mix with anything except water. Use an Ecolab dispenser to prepare a fresh solution of Sanitising Floor and Drain Cleaner diluted at a rate of 16mL per litre of tap water. Cold or warm water may be used (50°C maximum). An Ecolab representative will install an Ecolab dispenser for use of this product.

To clean and sanitise floors and hard surfaces:

1. Dilute Sanitising Floor and Drain Cleaner at a rate of 16mL per litre of tap water.
2. Pre-clean heavily soiled surfaces.
3. Apply solution to floor and surfaces by flooding or liberally applying with a mop.
4. Scrub with a deck brush (or auto-scrubber), and squeegee excess solution into drain.
5. Surfaces must remain wet for 5 minutes. Allow to air dry. DO NOT RINSE. For optimal results, it is recommended to use Sanitising Floor and Drain Cleaner daily.

To clean and sanitise sinks drains, floor drains and trunk lines:

1. Dilute Sanitising Floor and Drain Cleaner at a rate of 16mL per litre of tap water.
2. Pre-clean heavily soiled drains.
3. Apply foam into drain using a foam applicator or similar device. Hold foam nozzle in drain opening to ensure that foam does not back out of drain. Foam must completely fill the pipe.
4. Surfaces must remain wet for 5 minutes. Allow to air dry. DO NOT RINSE. For optimal results, it is recommended to use Sanitising Floor and Drain Cleaner daily.

To remove and control small fly breeding grounds:

Routine daily cleaning and sanitising of drains and floors removes the breeding grounds for flies in restaurants, kitchens, food service areas, dishwashing areas, and bar and wait station areas.

1. Dilute Sanitising Floor and Drain Cleaner at a rate of 16mL per litre of tap water.
2. Pre-clean heavily soiled surfaces and drains.
3. Apply by pouring, mopping, sponging, or foaming onto the surface. Completely fill drains with foam and coat all sides of the drain.
4. Surfaces must remain wet for 5 minutes. Allow to air dry. DO NOT RINSE. For optimal results, it is recommended to use Sanitising Floor and Drain Cleaner daily.
